Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem. Once you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this scenario, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. A company has a client device that runs Windows 10 Pro. The device has a folder named Folder1. The folder is configured using the following settings:

Permission type	Group
Share	Administrators
Share	Users
Share	Everyone
NTFS	Administrators
NTFS	Users

A user reports that they cannot change documents when accessing them over the network. You need to ensure that the users can change documents in the folder. Solution: You set the Users group share permission to Modify. Does the solution meet the goal? A. Yes B. No Answer: A Explanation: <https://www.online-tech-tips.com/computer-tips/set-file-folder-permissions-windows/> <https://www.teamknowhow.com/kit-guide/computing/windows/windows-10-file-sharing> QUESTION 149 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this scenario, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. A company has a client device that runs Windows 10 Pro. The device has a folder named Folder1. The folder is configured using the following settings:

Permission type	Group	Action
Share	Administrators	Full Control
Share	Users	Full Control
Share	Everyone	Full Control
NTFS	Administrators	Full Control
NTFS	Users	Modify

QUESTION 159 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this scenario, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You are the administrator for a company. All devices run Windows 10 Enterprise and are members of the Adatum.com domain. All drives on the devices are formatted with the NTFS file system and have the default permissions assigned. You have a device which is used by multiple users and stores information for a specific project. The project team members are members of a group named ProjectX. The system is also used by other people that are not members of the ProjectX team. All files for ProjectX are stored in a folder with the path E:ProjectX. You have the following requirements: Only members of the ProjectX group must have all permissions on the folder and all of the files in it. ProjectX members should not be granted any specific rights to any other folders. You need to meet the requirements. Solution: You disable inheritance on the E:ProjectX folder and specify the Copy option. You assign the Full Control permission to the Project X group. Does the solution meet the goal? A. Yes B. No Answer: B

QUESTION 160 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this scenario, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You are the administrator for a company. All devices run Windows 10 Enterprise and are members of the Adatum.com domain. All drives on the devices are formatted with the NTFS file system and have the default permissions assigned. You have a device which is used by multiple users and stores information for a specific project. The project team members are members of a group named ProjectX. The system is also used by other people that are not members of the ProjectX team. All files for ProjectX are stored in a folder with the path E:ProjectX. You have the following requirements: Only members of the ProjectX group must have all permissions on the folder and all of the files in it. ProjectX members should not be granted any specific rights to any other folders. You need to meet the requirements. Solution: You disable inheritance on the E: drive and specify the remove option. You assign the Full Control permission to the Project X group. Does the solution meet the goal? A. Yes B. No Answer: B **!!!RECOMMEND!!!** 1.
